PRICES 2012

Subterranean Managed Account - Prices start at \$10/YEAR

With a managed account we take care of everything via a remote connection - we install the Subterranean Software, install Subterranean updates as they are released, perform restores when needed, select new data when new programs are installed or old ones updated on your computer, monitor daily "Backup Successful" emails, proactive on any issues that arise... Plus you will have a direct number to a support tech person in America. You can change from a Subterranean Managed account, to a Self Managed Account at any time, and vice versa. No change fees. [Click Here to Sign up Now.](#)

Self Managed Account - Prices start at \$7/YEAR

With this type of account, you the client, look after your daily Subterranean Online Backups. The more data you have to backup and/or the more PCs/Servers you plan on backing up, the more we encourage Subterranean Managed Accounts. You can change from a Self Managed Account to a Subterranean Managed Account at any time, and vice versa. No change fees. **Enter coupon code SELFMANAGE** during signup to receive the 30% discount for self managed accounts. [Click Here to Sign up Now.](#)

ServerSave Account - Call or email for prices

ServerSave accounts are designed to backup SQL and Exchange live. Backup Sharepoint. Create bare metal images of your hard drive(s). Stream the bare metal images to the Subterranean Cloud. You also receive our Central Control "Pulse" software, which allows you to deploy policies for each machine, monitor backups, create restores, etc., etc. Everything you need to oversee and manage the online backup of 100+ machines. ServerSave accounts can be Subterranean Managed or Self Managed - your choice. For more info on our ServerSave Service [CLICK HERE](#). Call us direct for a quote or [Click Here](#) For ServerSave Quote Form.

Our pricing structure is unprecedented in the industry. Prices are based on the size of data you selected for backup not storage size. Our pricing structure is, and is an enormous advantage to our clients. For example, if you have 16GB that needs backed up, you would opt for a 20GB Subterranean Account. Since we do not delete ANY of your backed up data from our data center, your storage size grows and grows and grows. However, your cost does NOT grow. After just 3 years, your storage size could be 10X larger than your account size, you will have over 1,000 backup dates in storage ready for restore, and still be paying for a 20GB account. ANY file you have backed will be available for restore, from ANY backup date.

Competitors will routinely delete your old backup dates, your old files, and your old folders, that THEY believe you no longer need to keep. This is an attempt on their part to keep your 20GB account below 20GB of storage space. Thus, your restorable data will be limited to what data of yours they have not deleted yet. After 3 years, they will have deleted around 990 backup dates of yours, and thousands of files; whereas we have deleted ZERO backups...Zero Files.
